FOR IMMEDIATE RELEASE, November 14, 2009

PHOENIX EAST AVIATION A CESSNA PILOT CENTER

Daytona Beach, Florida, USA — Phoenix East Aviation, Inc. (PEA) announces becoming a Cessna Pilot Center. Phoenix East Aviation, which has been training pilot candidates for airlines worldwide since 1972, flies Cessna C-172 aircraft for all its single-engine training.

A flight school which has been designated as a Cessna Pilot Center is a specially selected aviation academy that represents top-quality, professional flight training. Such schools have state-of-the-art training facilities, well-trained professional instructors and aircraft with modern components and strict maintenance and safety requirements. Phoenix East Aviation's facility in Daytona Beach, Florida, easily met all those standards, according to Phoenix East Chief Executive Officer, Ghassan Reslan.

Cessna C-172 aircraft are rugged and dependable, and the most appropriate single-engine training aircraft today. Phoenix East aircraft also include the highly advanced Garmin G1000 glass cockpit. The G1000 flight deck package simplifies all primary flight, engine and sensor data for intuitive, at-a-glance awareness and provides excellent training for the professional, career-minded student, such as those students who come to Phoenix East Aviation from countries throughout the world and then progress to become airline pilots.

Phoenix East Aviation, Inc. provides comprehensive pilot training, specializing in professional flight instruction. FAR Part 141, private, commercial and multi-engine professional programs and FAR Part 61 courses are offered. The school is nationally accredited and is approved to offer Veteran Benefits under the G.I. Bill, as well as offering M-1 and J-1 visa programs for foreign students. Headquartered in Daytona Beach, Florida, where the climate permits flight operations 350+ days a year, the school has been in continuous operation since 1972.
